YOGA SUNDARAM RAMA SWAMY

Cleveland, OH | 216-200-2712 | yogasundaram95@gmail.com | linkedin.com/in/yogasundaram
Portfolio: yogasundaram95.github.io/yoga_sundaram | github.com/yogasundaram95

SUMMARY

- 6+ years in machine learning data, statistical modeling, and analytics across Amazon, Bendix (a $1B+ Knorr-Bremse company), AI-model evaluation at Handshake AI, and university research. M.S. Information Systems, 3.94 GPA.
- A/B tested a new ADAS product grouping on Bendix's marketing site; **ADAS sales rose ∼15%**.
- Forecast **unit sales across 4,000 customers and 240 products** with regression models in Python and SAS, presented to Sales Finance leadership.
- Held ∼**99.8% accuracy across 100,000+ annotations** producing training data for computer vision and NLP models at Amazon; promoted within 11 months.

Technical Skills: Python (pandas, scikit-learn, PyTorch), R, SQL, experiment design (A/B testing, significance testing), regression, forecasting, ANOVA, SAS, SPSS, MATLAB, Snowflake, Amazon Redshift, SAP HANA, Microsoft Fabric, AWS (S3, Lambda, SageMaker), Tableau, Power BI, Amazon QuickSight, ArcGIS, Git

PROFESSIONAL EXPERIENCE

Handshake AI **Remote**
AI Fellow (Part-time, ∼20 hrs/week) **Mar 2026 – Present**
Handshake AI is the AI-training arm of the Handshake career network, supplying vetted domain experts to AI labs. Project-based AI research and model-evaluation work.

- Built **8 analysis-ready evaluation datasets from 3 sources** in Snowflake and Microsoft Fabric using SQL CTEs and window functions.
- Test AI-generated data science solutions against **20+ data-quality checks and test cases**, judging reasoning and execution correctness with SWE-Bench, Claude Code, and terminal-based reference evaluations.
- Diagnosed **4 recurring failure patterns** in model outputs through root-cause analysis and documented corrective recommendations, improving reproducibility for 2 evaluation workflows.

Cleveland State University **Cleveland, OH**
Research Assistant – AI Model Adoption (Part-time) **Jan 2026 – Present**
Public research university in Cleveland. Research project forecasting how open-source AI models are adopted across software ecosystems.

- Designed **Python and R pipelines** collecting npm, Hugging Face, and GitHub API data.
- Built a reproducible panel dataset of **75 AI models and 67 features** for statistical forecasting.
- Validate the data with checks for package contamination, snapshot bias, and contributor-count anomalies, documenting sampling limits to **protect downstream model validity**.

Bendix Commercial Vehicle Systems **Avon, OH**
Sales Operations Co-op – Business Intelligence (Full-time) **Jan 2025 – Dec 2025**
Bendix, part of Germany's Knorr-Bremse Group, makes braking and active safety systems for North American commercial vehicles, with $1B+ in annual sales. Worked in Sales Operations supporting Sales Finance.

- A/B tested a new grouping of ADAS (driver-assistance) products on the marketing site against the previous layout; **ADAS sales rose ∼15%**.
- Built regression and statistical models in Python and SAS to **forecast unit sales across 4,000 customers and 240 products**, plus customer segmentation; presented findings to Sales Finance leadership.
- Automated a previously manual **tariff-impact** analysis and recommended next steps; leadership used it in negotiations.
- Automated recurring reporting with Python, SQL, and Power BI, **cutting preparation from 6 hours to 25 minutes** at ∼99% accuracy.

Amazon Development Centre India Pvt. Ltd. **Chennai, India**
Data Associate II (Machine Learning Data Analyst) **Oct 2020 – Mar 2023**
Data Associate I (Machine Learning Data) **Nov 2019 – Oct 2020**
Amazon's India development center. Worked on Amazon Alexa's machine learning data team, producing labeled training data for computer vision and NLP models.

- Produced and validated training data for **computer vision (object detection) and NLP models** in Amazon SageMaker.
- Held ∼**99.8% accuracy across 100,000+ annotations** through quality-assurance procedures.
- Defined the **KPIs reported in Monthly Business Reviews** and tracked 10+ KPIs in QuickSight and Kibana using Amazon Redshift SQL (CTEs, window functions), with statistical analysis in SAS and SPSS.
- Built Python workflow automation routing tasks by productivity and quality (Amazon S3, AWS Lambda), **raising throughput by ∼10%**.
- **Promoted to Data Associate II within 11 months**; trained and mentored 20+ associates in SQL, data analysis, and quality control.

Gharib Shipping Services LLC **Chennai, India**
Operations Data Analyst – Business Intelligence (Part-time) **Jul 2017 – Oct 2019**
Shipping and logistics services company handling warehousing and shipment operations.

- Ran SQL root-cause analysis on ∼70,000 warehouse and shipment records, informing process changes that delivered ∼**15% efficiency gains and $2,000 in monthly savings**; tracked KPIs for 500+ monthly shipments (∼99.5% on time).

SELECTED PROJECTS

Variable Star Classification from NASA NEOWISE Light Curves **2026**
Python, PyTorch, CNN, wavelet and Fourier transforms | github.com/yogasundaram95/varnet-replication

- Reimplemented VARnet (Paz, 2024, *The Astronomical Journal*) from the paper alone: a PyTorch CNN with wavelet and learned Fourier-transform layers that classifies infrared light curves into 4 variability classes.
- Built a synthetic NEOWISE light-curve generator and trained at the paper's scale (**1.06M curves**) on an Apple-silicon GPU, reaching **macro F1 0.987** on 4,000 held-out synthetic curves.
- Error analysis showed faint variables read as constant and pulsator–eclipse confusion, the same ambiguity the paper reports; next step is validation on real sources (paper: F1 0.91).

Cleveland 311 Service Performance (independent project) **2026**
Tableau, ArcGIS REST API, City of Cleveland Open Data

- Analyzed **182,214 public 311 requests** against each request's target date: 68.3% closed on time overall but 54.0% outside Trash & Recycling; flagged 3,262 open requests past target and compared all 15 council wards (65–72%).
- Built a two-page Tableau dashboard, checked every figure against direct queries on the City's data service, documented data-quality gaps (3,281 closed requests with no target date), and recommended fixes.

EDUCATION

Cleveland State University, Master of Information Systems, GPA 3.94/4.00 Aug 2023 – Dec 2025
B.S. Abdur Rahman Crescent Institute of Science and Technology, B.Tech. Aeronautical Engineering Jun 2017

CERTIFICATIONS

Microsoft Certified: Fabric Data Engineer Associate (DP-700) Dec 2025
Google Data Analytics Professional Certificate Oct 2024
Oracle Cloud Data Management Certified Foundations Associate Nov 2023
